What I do as an artist can be called "mystical realism" or "subjective realism".

In my paintings, I unite realism and symbolism, and at the same time, the reflection of reality occurs through the use of symbolic elements that complement and, perhaps, explain reality. Reality is processed at a subconscious level and becomes subjective. Unconsciously arising images and forms allow to strengthen the emotional and semantic loading of the picture. With superficial illogicality, everything is built on an internal logical basis. I unite the physical and metaphysical world.

At the same time, I paint portraits. I also paint realistic portraits in the style of a la prima to order. I experiment with impasto painting of landscapes, portraits and still lifes.

My works are in private collections in Russia, USA, Portugal, Germany, Austria, France, Belgium, Italy...
